

SPEC SHEET

Accent Design Concepts

AUDIOROCK/RS.2.0

This stereo outdoor wireless rock speaker, with a 5" Woofer is optimally tuned for outdoor performance.

The sound is electronically equalized to provide superior acoustic performance in open-air environments. Neutral Granite styling allows this system to blend unobtrusively into most outdoor environments.

This single-speaker stereo unit provides dual-channel audio from a single enclosure.

Electronics:

- Battery compartment accepts supplied rechargeable battery providing up to 8 hours of playback [depending on type of music and volume]
- Built-in 2.4GHz wireless receiver
- 40 watts peak total audio amplifier power.
- On-board on/off control and volume control allow direct volume adjustment without need of the supplied RF remote
- Weatherproof sealing of electronics assures reliability of unit over time when left outdoors

Acoustics:

- Dual Voice Coil 5 1/4" Environmental Injection Molded Polypropylene Woofer
- Dual 3/4" Polypropylene Tweeters
- Drivers are angled upward 20 degrees to deliver great sound when system is placed at ground level.
- System uses active acoustic equalization to smooth, enhance and extend frequency response

Mechanics and Reliability:

- Fully weatherproof enclosure and drivers are UV protected with rustproof hardware and grille [IEC 60529, IPX4, PI X5]
- All components tested to withstand temperature and humidity extremes

Accessories:

- Long-lasting rechargeable lithium-ion Battery Pack provides up to 8 hours of audio when fully charged.
- Recharges in 4 hours
- Separate Charging Base for the Battery
- DC Power Supply for Battery Charger
